

# Tips for Cockroach Control at home

Evolution has provided cockroaches with extreme survival capabilities. So if you have **cockroach infestation** at home you will find it very difficult to control them. **Cockroach extermination** is very very important as cockroaches are known carriers of many diseases.

## Checking any sign of Cockroach infestation

Cockroaches prefer to live in dark, damp and moist places. Always check your plumbing pipes and drainages for any sign of **cockroach infestation**.

## Devoid them of Food

**Pest infestation** is almost directly dependent on their food and nourishment. If you avoid keeping food in open and don't leave food crumbs lying around, this will turn out to be a good **cockroach control** method.

# Cockroach Killing Home remedy

Borax or Boric acid is an easily available product in the market. Borax is the most common chemical used for **cockroach extermination**. It safe to use and easy to deliver in every corner.

## Professional Assistance

**Cockroach infestation** and other kinds of **pest infestation** require the involvement of **professional pest controllers**. Pest Destroy, Australia provides one of the best **pest control services** and with the use of latest machinery and well-crafted products, we will make your homes and offices pest free.
